

# Mohammad Talib Khan

AI Search Optimisation (AEO / GEO) | SEO Specialist | Digital Marketing Coordinator

Palmerston North 4412, New Zealand · talibkhan.seo@gmail.com · +64 20 4046 8769 · [LinkedIn](#) · [Portfolio](#)

## EXPERIENCE SUMMARY

---

SEO specialist with five years of agency experience, the last three focused on AI search, which means getting a brand named and cited inside ChatGPT, Google AI Overviews, Perplexity and Gemini answers rather than only ranked in blue links. The day to day is technical SEO, entity and schema structuring, content written so a model can quote it cleanly, GA4 reporting, Google Ads and hands-on front-end fixes. Have worked across 70+ client websites in five years, including one that gained 300% organic traffic in six months and a portfolio of sites improved 30%+ on page load. Also build my own tools, including a multi-tenant rank tracking dashboard in Next.js. Currently in Palmerston North on a visitor visa and available for face-to-face interviews. Looking to settle in New Zealand permanently, close to family.

## CORE CAPABILITIES

---

- **AI Search (AEO / GEO):** Answer Engine Optimisation and Generative Engine Optimisation, entity and topic mapping, JSON-LD structured data, citation-ready content formatting, E-E-A-T signals, llms.txt, monitoring brand visibility in AI Overviews and chat assistants
- **SEO:** Technical SEO, on-page optimisation, keyword research, content gap analysis, Core Web Vitals, schema markup, link building
- **Paid advertising:** Google Ads (search campaigns), Meta Ads, budget monitoring, audience testing, ROAS optimisation
- **Analytics and reporting:** Google Analytics 4, Google Search Console, conversion funnel analysis, KPI dashboards, performance reporting
- **Tools and platforms:** SEMrush, Ahrefs, Moz, Screaming Frog, WordPress, Shopify, Figma
- **AI and automation:** Prompt engineering (ChatGPT, Claude), LLM-assisted ad copy and content production, workflow automation, Next.js and Prisma for internal tooling
- **Web:** HTML, CSS, JavaScript (front-end implementation), CRO, A/B testing, page speed
- **Email and retention:** Campaign strategy, segmentation, customer journey mapping

## EMPLOYMENT HISTORY

---

### SEO Team Lead | Digitabytes, AI-Powered Digital Marketing Agency

2025 – Aug 2026

Led organic, paid and AI search strategy across 15+ live client accounts.

- Led a team of SEO specialists across technical, on-page and off-page work, setting strategy, reviewing deliverables and mentoring the junior members
- Set up AEO and GEO workstreams on client accounts. Mapped the questions buyers actually put to an assistant, then restructured pages so the answer sits in a block a model can lift and attribute
- Aligned SEO and Google Ads strategy to improve cross-channel ROAS for key clients
- Built and presented KPI dashboards covering organic traffic, keyword velocity, conversion rate and domain authority
- Used ChatGPT and Claude for campaign planning, ad copy, content briefs and trend analysis

### Senior Technical SEO Executive | Digitabytes

2024 – 2025

Delivered technical SEO and front-end fixes across 20+ client websites.

- Ran full technical audits covering site architecture, Core Web Vitals (LCP, FID, CLS), structured data, crawl efficiency and indexation
- Grew organic traffic 300% for a key client inside six months through content strategy and on-page work
- Improved page load performance 30%+ across 20+ sites by writing the HTML, CSS and JavaScript fixes myself, with no developer dependency
- Implemented JSON-LD schema (FAQ, Article, BreadcrumbList, LocalBusiness), the same structured data AI answer engines read when they decide which source to cite
- Monitored traffic quality, user behaviour and conversion funnels in GA4 to find conversion rate opportunities

## Senior On-Page SEO Expert | Digitabytes

2023 – 2024

Owned keyword strategy, content optimisation and on-page execution for a portfolio of client sites across several industries.

- Ran keyword and question research in SEMrush, Ahrefs and Search Console to find high-intent opportunities
- Improved average keyword rankings 25%+ within six months through content gap analysis and structured on-page work
- Built out E-E-A-T signals across content assets in line with Google Helpful Content guidance, which is where the AEO work started
- Wrote content briefs and editorial guidelines for a team of 8+ writers, which improved first-draft quality and cut revision cycles
- Optimised meta titles, H-tag hierarchy, internal link architecture and image attributes

## Senior Off-Page and Link Building Executive | Digitabytes

2021 – 2023

Built high-authority backlink profiles for 15+ client websites with no manual penalty incidents.

- Ran outreach campaigns securing contextually relevant backlinks from industry publications, niche blogs and digital PR placements
- Built a webmaster network of 100+ contacts, which brought down the cost per placement
- Audited and managed backlink profiles in Ahrefs and Google Disavow, keeping anchor text ratios and link velocity healthy
- Helped 10+ brands each pass 1,000 high-authority backlinks

## KEY ACHIEVEMENTS

---

- Worked on 70+ client websites over five years, across ecommerce, legal, industrial and local service businesses
- 300% organic traffic increase for a major client within six months
- 30%+ page load improvement across 20+ websites through direct front-end implementation
- 25%+ keyword ranking uplift within six months through content gap analysis and on-page work
- Zero Google manual penalties across every managed backlink portfolio over three years
- Moved from individual contributor to SEO Team Lead in four years

## PROJECTS

---

### Rank Pilot, Multi-Tenant SEO Rank Tracking Dashboard (2026)

Built a client-facing rank tracking platform in Next.js 16 (App Router), TypeScript, Tailwind CSS, Prisma and SQLite, with NextAuth.js handling JWT sessions and role-based access so each client only sees their own data. Tracks keyword rankings, organic traffic and lead conversion per project, charts it in Recharts, and ships with a deterministic seed pipeline for demo data.

### AI Workflow Automation System (2026)

Six-module system that runs a structured research and outreach process end to end. It aggregates listings from multiple sources, filters them against government eligibility registers, generates country-specific documents for five markets, logs every record into Excel, and holds all outbound communication behind a mandatory human review gate.

## EDUCATION AND QUALIFICATIONS

---

### Bachelor of Technology (B.Tech), Computer Science and Engineering

Dronacharya Group of Institutions, India | 2021

## PROFESSIONAL CERTIFICATIONS AND COURSES

---

- AI SEO and GEO: Boost Your Brand's AI Visibility, Professional Certificate (Aug 2026)
- Google / Coursera, Create High-Fidelity Designs and Prototypes in Figma (Jan 2024)
